

**PATENT CLAIMS**

1. A laminated sheet for the display of information, said sheet comprising a lower base layer which consists of a print layer (4, 8, 9) having a protective layer (1, 2) laminated on its upper side, characterized in that a net layer (5) of polyester is laminated below the print layer (4, 8, 9).
2. A laminated sheet according to claim 1, characterized in that the print layer (4) is formed by a rubber material.
- 10 3. A laminated sheet according to claim 1, characterized in that the print layer (8, 9) is a laminate which consists of PVC (8) and a plastics/adhesive layer (9).
- 15 4. A laminated sheet according to claims 1 – 3, characterized in that a glue (6) and a film (7) are laminated below the polyester layer.
5. A laminated sheet according to claim 4, characterized in that a plastics/adhesive layer (10) and a PVC layer (11) are laminated between the polyester layer (5) and the glue (6).
- 20 6. A laminated sheet according to claims 1 – 5, characterized in that the protective layer is formed by a laminate which consists of a polyurethane layer (2) and a frictional layer (1).
- 25 7. A laminated sheet according to claim 6, characterized in that the frictional layer (1) consists of glass beads and broken glass.
- 30 8. A laminated sheet according to claims 1 – 7, characterized in that the sheet has a thickness of between 0.3 and 2.5 mm or of between 3 and 12 mm.
